Summary

A full-stack engineer focused on building modern, scalable, and user-friendly web applications, currently delivering Odoo-based ERP solutions at 360 Ground. I enjoy solving real-world problems by creating reliable backend systems and responsive user interfaces. As an AI enthusiast, I love learning, experimenting, and exploring opportunities in machine learning to bring intelligence into web solutions.

Professional Experience

08/2026 – Present
Addis Ababa · On-site
360 Ground (Eldix IT PLC), *Full Stack Engineer*
Odoo ERP development: custom finance & accounting modules for enterprise clients.

07/2026 – 08/2026

11/2025 – 03/2026
Remote
10 Academy, *Internship Trainee*
AI/ML projects: sentiment analysis, credit-risk & fraud models, RAG chatbot, forecasting.

03/2025 – 07/2025
Addis Ababa · Hybrid
Efuye Gela, *Full Stack Engineer Intern*
Built a full-stack website with teammates and delivered it on time.

Education

05/2022 – 06/2026
Debre Birhan
Software Engineering, *Debre Birhan University*

Mizan Aman
Secondary School, *Abune Teklehaymanot Academy*

Teppi
Primary School, *Post Cambridge Academy*

Skills

Frontend
- TypeScript / JavaScript
- React
- Next.js
- Vite
- Tailwind CSS

Backend
- Node.js
- Express
- RESTful API Design
- PostgreSQL & Prisma
- MongoDB

ERP
- Odoo 17 custom modules
- Python (Odoo ORM)
- XML views & QWeb reports
- Finance & accounting flows
- Excel & PDF reporting

DevOps & Tools
- Docker
- Linux & SSH deployment
- Git & GitHub
- Postman / REST Client

Latest Projects

EDIF ERP – Ethiopian Deposit Insurance Fund
An Odoo 17 ERP built at 360 Ground for EDIF, digitizing its finance & accounting, HR and procurement operations.
- Role: Odoo developer on the finance & accounting track; built custom Python/XML modules, deployed with Docker, ran client UAT.
- Key features: deposit insurance premium billing with approval workflows, investment management (incl. Mudarabah), fixed assets/PPE with depreciation, petty cash, leases, provisions, and bank reconciliation.
- Reporting & controls: client-template financial statements with Excel and PDF export, a 154-account chart of accounts, period locks, segregation of duties, and an audit trail.

Lawbridge Ethiopia Live demo
LawBridge Ethiopia, an AI-powered legal services platform that connects clients with verified lawyers and streamlines case workflows.
- Role: Full-stack developer & project lead for a team of four; owned architecture, backend APIs and frontend delivery.
- Key features: case management, real-time messaging, lawyer verification, and secure escrow payment processing.
- AI integrations: legal Q&A, document analysis, and smart lawyer matching to improve client–lawyer fit and speed up responses.

Shega Cafe Menu Live demo
Solo-developed a responsive digital café menu web app that improves product discoverability and mobile usability for local cafés.
- Designed a mobile-first, accessible UI with fast cross-device performance.
- Implemented menu categorization, pricing, and easy content updates to reduce owner maintenance overhead.
